

PRODUCTION PLANTS SUPPORT

ABB

Project Overview:

AIT were approached by ABB Transmission & Distribution to provide control system support for their manufacturing facilities at Darra in Brisbane, QLD and Osborne Park in Perth, WA.

Details:

The systems in place at ABB use a variety of PLCs from manufacturers such as GE Fanuc, Allen Bradley, Koyo, Horner and Omron. SCADA systems in use include RS View, Cimplicity HMI and Koyo Think 'N' Do.

AIT's extensive engineering and product knowledge was instrumental in this projects success. Although plant breakdown's are rare, dependable support and improvement services are assured by this contract providing peace of mind for ABB management.
